

# Appendix Z: Course-wide Instructor Notes

## 1. Training Lab System Setup

1. Open the AWS site from here: <https://aws.amazon.com/>
  - Login Credentials for Chef instructors: [training-aws@chef.io](mailto:training-aws@chef.io)
  - Password: Contact Chef Training Services if you don't know it or how to obtain it. [training-feedback@chef.io](mailto:training-feedback@chef.io)
  - Partner credentials should be provided by Chef directly to partners.
2. Click the first link in column **EC2 Virtual Servers in the Cloud**
3. From the navigation pane on the left, select **Images/AMIs**. The "Step 1" page displays with a list of available AMIs.
4. Select **Chef Essentials Windows 2012 - 1.0.1** from the list of options.
5. Click **Launch**. The "Step 2" page displays.
6. Select the first **m4.xlarge** from the list provided and click **Next: Configure Instance Details** at the bottom of the screen. The "Step 3" page displays.
7. Enter the **Number of Instances**.

*Note: You will need 3 instances for each student enrolled in the class - and three for yourself.*

8. Set the **IAM Role** to *test-kitchen*.
9. Click **Next: Add Storage** at the bottom of the page. The "Step 4" page displays. [Don't change anything on this page].
10. Click **Next: Tag Instance** at the bottom of the page. The "Step 5" page displays.
11. Enter a **Value**.

*Note: A recommended naming convention for the instances: [TRAINER'S INITIALS] - [CLASS NAME] - [CLASS DATE]*

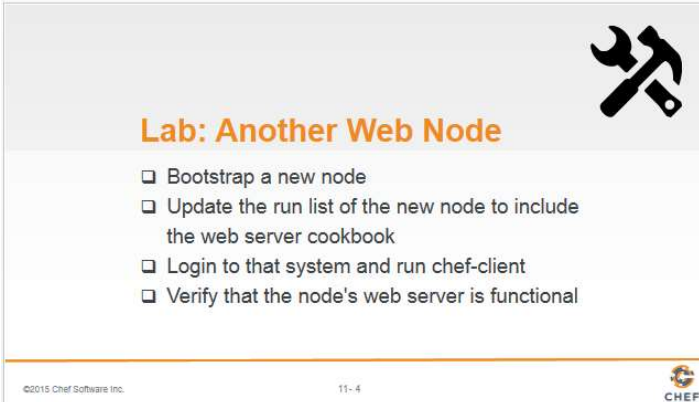

12. Click **Next: Configure Security Group**. The "Step 6" page displays.
13. Click the **Select an existing security group** radio button. A list of security groups displays.
14. Select **all-open**.
15. Click **Review and Launch** at the bottom of the screen. The "Step 7" page displays.
16. After you review the instances, click **Launch**. The "Select a key pair" window displays.
17. Confirm that this is set to **Choose an existing key pair** and click the acknowledgement check box.
18. Click **Launch Instances**. The "Launch Status" page displays.
19. Click **View Instances**. The instances list displays.
20. From here, copy all of the instances and create a gist file to share with the class.
21. Use [goo.gl](https://goo.gl) to shorten the URL to the gist file.

**Note:** The login credentials and password for the AMIs used in class are Administrator/Cod3Can!. You'll need to tell the students that at the appropriate time.

## 2. How to Use Lab Slides

Regarding the "Lab" exercises (not the Group Exercises), you should encourage students to use the high-level hammer/wrench "Lab" slide steps first, and then resort to the subsequent detailed step slides if the students need the details to complete the lab. You can still use the subsequent detailed step slides as a vehicle to review each lab. For example:

This is a high-level hammer/wrench "Lab" instruction slide. Encourage students to complete the lab using this high level hammer/wrench "Lab" slide first.

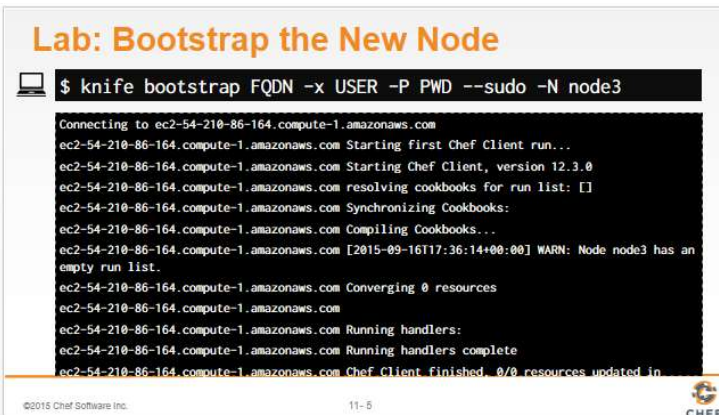

The slide features a header with a hammer and wrench icon. The title is "Lab: Another Web Node". Below the title is a list of four steps: Bootstrap a new node, Update the run list of the new node to include the web server cookbook, Login to that system and run chef-client, and Verify that the node's web server is functional. The footer contains the copyright notice "©2015 Chef Software Inc.", the slide number "11-4", and the Chef logo.

**Lab: Another Web Node**

- ❑ Bootstrap a new node
- ❑ Update the run list of the new node to include the web server cookbook
- ❑ Login to that system and run chef-client
- ❑ Verify that the node's web server is functional

©2015 Chef Software Inc. 11-4 CHEF

If some students can't complete the lab based on the above slide, they are free to follow the subsequent detailed step slides, such as these:

The slide features a header with a laptop icon. The title is "Lab: Bootstrap the New Node". Below the title is a terminal window showing the command "\$ knife bootstrap FQDN -x USER -P PWD --sudo -N node3" and its output. The output shows the process of connecting to the node, starting the Chef Client, resolving cookbooks, synchronizing cookbooks, compiling cookbooks, and running handlers. The footer contains the copyright notice "©2015 Chef Software Inc.", the slide number "11-5", and the Chef logo.

**Lab: Bootstrap the New Node**

```
$ knife bootstrap FQDN -x USER -P PWD --sudo -N node3
```

```

### Lab: Verify the New Node

```
$ knife node show node3
```

```
Node Name: node3
Environment: _default
FQDN: ip-172-31-0-127.ec2.internal
IP: 54.210.86.164
Run List:
Roles:
Recipes:
Platform: centos 6.6
Tags:
```
